Youth Sports Safety Alliance,

I am writing you today to express Baylor College of Medicine's support of the Youth Sports Safety Alliance Call to Action.

Baylor College of Medicine and specifically the Orthopedic Surgery and Sports Medicine Departments mission and vision align with that of the alliance. Our department strives to achieve the highest level of quality care to our patients of all ages, has a strong focus on community education and cutting-edge research that is applicable to practice. We are particularly focused on injury prevention and education.

The work we do is intended to take place in a patient-centered environment geared toward treating athletes of all ages with supportive technologies and focused on quality, safety, effectiveness, and education.

Thank you for considering us to be a part of this extremely important alliance.

Meghan McKay, M.Ed., ATC, LAT, ITAT
