June 10, 2014

West Coast Ultrasound Institute is proud to become a member of the Youth Sports Safety Alliance.

West Coast Ultrasound Institute trains professionals in Pediatric Cardiac Ultrasound and Congenital Heart Disease. To ensure the heart health of youth in the community, West Coast Ultrasound Institute offers free Non-Diagnostic Echocardiogram screenings. This screening is an ultrasound of the heart and can help detect heart defects and abnormalities, even when no symptoms are present.

An estimated 3,000 to 6,000 youths die each year from sudden cardiac death in the United States.

We are pleased to work with the members of the Youth Sports Safety Alliance to further our collective efforts to keep children and young athletes safe.

Sincerely,

Shanel D. Oliver, MBA, Ed. D

Director of Education
