To Whom It May Concern:

We are proud and honored to join the National Athletic Trainers' Association call to action regarding Youth Sports Safety. As a company, ImPACT Applications has devoted the past 15 years to studying the effects of cerebral concussion in the youth sport population. Tremendous advances in knowledge have occurred in understanding and managing sports concussion. Based upon these scientific advances, we have clearly learned that proper management of sports concussion is the best way to prevent against the short- and potentially long-lasting effects of repetitive concussive injuries. Absolutely critical to this process of proper recognition, assessment, and management of concussive injury is the work of Certified Athletic Trainers. In our strong opinion, every school in the country should have access to these licensed professionals, and we are fully committed to providing support in this respect. As leaders in the field of concussion assessment and research of this injury, we support the mission of the NATA Summit and are proud to be involved in this endeavor.

Sincerely yours,

Micky Collins, Ph.D.
Chief Clinical Officer
Co-Founder
ImPACT Applications, Inc.
