Carrollton, TX 75006

Dear Ms. Satlof:

Nebraska Medicine is pleased to join and support the efforts of the National Youth Sports Safety Alliance. Located in Omaha, Nebraska we are proud to provide high quality medical care and services that extends across Nebraska and into surrounding states.

Nebraska Medicine has a young but growing sports medicine program. While the program goal is to provide comprehensive sports medicine services to those participating in sports, recreation and physical activity across the ages, ensuring the health, safety and well-being of those participating in youth sports is a priority. Members of our Sports Medicine Team are active in community and state-wide efforts which embody your call to action; serving as members of the Nebraska Concussion Coalition, local Brain Injury School Support Teams, the Nebraska School Activities Association Sports Medicine Advisory Committee, the Omaha Public Schools Sports Medicine Advisory Committee and the Nebraska Cardiac Task force. We are invested in caring for the young and developing athletes within our community, providing physician and athletic training services to area high schools. With other partners throughout the Omaha medical community, we provide ImpACT testing to more than 60 local high schools, middle schools and youth sports organizations annually. In short we have chosen to uphold the mission of the Youth Sports Safety Alliance through collaborating internally, and with groups throughout the community and state whose priority is the safe participation and healthy development of those taking part in youth sports activities.

Nebraska Medicine is proud to be a part of the ongoing and groundbreaking efforts of the Youth Sports Safety Alliance to increase knowledge and awareness surrounding the safe, healthy and continued involvement in youth sports across our state and across the country.

Sincerely:
