Dear Ellen,

For more than 26 years, Trident Sports Medicine has provided quality sports medicine services to the active population we serve in the lowcountry. Trident Sports Medicine strives to have the most progressive, comprehensive and individualized services in the community. Our success is directly related to the outcomes achieved through prevention and treatment of movement dysfunction and the functional health of the athletes. Trident Sports Medicine believes that its success is directly attributed to the athlete's ultimate outcome and satisfaction. A key component of Trident Sports Medicine is the "team approach." This means that the athlete benefits from a group of sports medicine specialists who work together to develop and implement the most effective evidence based care for the athlete.

As the leading provider of orthopedic and sports medicine services in the lowcountry we have partnered with Berkeley and Dorchester counties to provide eight full time certified athletic trainers in eight of their public schools. Through education, supervision and treatment, our athletic trainers currently care for thousands of high school athletes.

Trident Sports Medicine was one of the first Credentialed ImpACT Consultants in the state of South Carolina and has performed over 15, 000 baseline and post injury tests through our concussion management program.

Trident Sports Medicine was instrumental in forming a multidisciplinary task force to develop and implement new school district Exertional Heat Illness policy and procedure for the 2009-2010 school year. Trident Sports Medicine also purchased ice emersion tubes for all district high schools.

Because of our commitment to the safety and well-being of our community who participate in sport activities we are fully supportive of the Youth Sports Safety Alliance's mission will supports it's "Call to Action".

Sincerely

Guy Walker M.Ed., ATC, CSCS

Sports Medicine Manager
