2952 Stemmons Freeway
Dallas, Texas 75247

Dear Ms. Satlof,

University High School is an urban school on the east side of Orlando, Florida with a student body population of 3,400. We currently have 780 student athletes at our school who are actively participating in our 42 sport teams. UHS and Orange County, have spearheaded many athlete safety programs and are continually committed and advocating the safety to our young adult population through community education, coaching education, athlete safety programs and most importantly the hiring of on-site Certified and Licensed Athletic Training Staffs at each of our 19 high schools. It is our educational goal through the use of these and many other actions we take to protect the health of our student athletes that we can obtain our initiate of keeping kids safe in our athletic programs.

UHS insures that we will commit to the Youth Sports Safety Alliance Call to Action nine areas of emphasis to promote and advocate the safety in youth sports and are proud to partner with the current agencies that promote similar standards.

We understand that this Call to Action was spearheaded by the NATA, which we believe epitomizes the importance of protecting our youth athletes on the courts, fields, pools and tracks of America.

Respectfully Yours in Sports,
Janet Wolbert
Head Athletic Director
