Erin Teeple, MD

Concussion Management
Elizabeth Jacobs, MD

December 12, 2011

To Whom It May Concern:

As a Sports Trained Emergency Medicine physician, the issues that make of the core of the Youth Sports Safety Alliance are topics I deal with everyday. I am so pleased to know that there is a group educating not only families and athletes, but also legislators to make sports a safer enterprise for our communities. It is the rare physician that combines the expertise of both emergency medicine and sports medicine and is able to translate this to the athlete and I would be happy to support a group whose efforts parallel mine.

Thank you,

Neha P. Raukar, MD, MS FACEP
